-  Travel
-  Video Games

VALENTIN MOIZAN

COMPUTER SCIENCE ENGINEER

INTRODUCTION

As an ISEN graduate engineer, I've been passionate about computer science since my teenage years. Self-taught in Java programming from the age of 15, I have acquired strong skills in software and fullstack development. My background combines academic training, professional experiences at Capgemini and Sopra Steria, and personal projects, allowing me to have both a theoretical and practical approach to software development.

PROJECTS

Online portfolio

<https://moizan-valentin.web.app> | 2020 - today

- Website development (Angular, HTML, SCSS, TypeScript)
- Automatic deployment using GitHub workflow on Firebase

2D Platform game

Developer | 2020

- Development of a 2D platform type game : C++ & QT

WORK EXPERIENCES

Capgemini

CDI | 2024

- Lead developer of a research project
- Web & backend development of an application from scratch (ReactJS, ExpressJS, GraphQL, PostgreSQL, Python, API)

Sopra Steria

Internship | April 2022 - September 2023

- Engineer position (JAVA, Typescript, python, web development)
- Working on projects : from project's cost evaluation to delivery, including design, development and qualification

EDUCATION

ISEN

Software engineering field | 2018-2023

- President of the computer science club : I organized and provided tutoring sessions for first-year students. I also organized various activities such as LAN parties.
- 2 weeks voluntary internship at Emmaüs Rennes
- In 4th year, I chose the professional field "Software Engineering".
